Continuation of 2. NOTE: The amendment and remarks relating to claims 1-4 and 15 have been considered, but are not persuasive. The claims do not specifically define the nature and position of the "centerline" as asserted by Applicant. The apparatus performs the claimed function within the broadest reasonable interpretation of the claimed "centerline." In regard to claims 7-10, the new limitations defining the bracket as comprising a metal base portion or steel plate extending across a width of the hood represents a new issue that requires further searching and consideration. Also, claims 5, 6, and 11-14 are in condition for allowance, but the amendments to these claims and the abstract will not be entered due to the amendments to claims 1-4, 7-10, and 15 in the amendment.
